### **DETAILED ACTION**

Newly submitted claims 46-54 are directed to an invention that is independent or distinct from the invention originally examined on the merits for the following reasons:

The instant application was subject to a restriction in the Official Action mailed 5/22/02. Applicant elected group II including a nucleic acid for transforming a plant and a method of making the nucleic acid. The Official Action mailed 5/22/02 did not address the merits of the invention due to the failure of applicant to correct deficiencies in the claims that would allow an examination on the merits (see Official Action mailed 5/22/02 and interview summary attached thereto). In applicants response filed 2/11/03 all claims drawn to methods of making a nucleic acid for transforming a plant were canceled. There has been no action on the merits for the invention of a method of making a nucleic acid for transforming a plant. Furthermore, the nucleic acid (of the originally filed claims) and the method claims added in the response filed 7/02/03 do not share a special technical feature since the nucleic acids claimed were not novel or unobvious as evidenced by the application Wilson et al (Biochemical and Biophysical Research Communications) in the rejections of record. The inventions are therefore properly restrictable and are restricted.

Since applicant has received an action on the merits for the originally presented invention (now instant claims 55 and 56), this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 46-54 are

Art Unit: 1635

withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G.

86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 55 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 55 recites "sequences encoded by AATAAA, NATAAA . . ." It is unclear, in the context of the claim what this recitation means. It is not clear what is meant by "sequences encoded by" the specific sequence recited since the specification at page 8, for example, indicates that such sequences [AATAAA and not those "encoded by"] be eliminated. The term is not defined in the specification and the context of the term is not

clear since it does not specifically relate back to that taught in the specification, for example.

Claim 56 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments with respect to claims 55 and 56 have been considered but are moot in view of the withdrawal of the rejections of record and new ground(s) of rejection. The rejections of record have been withdrawn in view of the new limitations set forth in new claims 55 and 56.
